

## **For Immediate Release**

# **Codan secures extensive US Forest Service order**

**Victoria, Canada – Codan Radio Communications, 16 March 2016.** Codan Radio Communications, a division of Codan Limited (ASX-CDA), has secured a \$3.2M order from the U.S. Department of Agriculture's Forest Service to supply MT-4E repeater systems to all nine forest regions throughout the United States.

The USFS (United States Forest Service) uses Codan's MT-4E rugged repeater systems in some of the harshest terrain and remotest locations within the country to ensure the maintenance of day-to-day operations and the safety of USFS personnel and co-operators. These systems also provide critical communications during emergency situations including wildfires and law enforcement.

Codan Radio Communications' Director of LMR Sales, Ben Pearce, emphasizes the importance of working with the USFS, "Our MT-4E repeater platform was developed specifically to operate in the harshest conditions to provide reliable communications for all situations, including emergencies and mission critical applications. This order only further demonstrates Codan's commitment to one of our key niche markets and long-standing customers."

The MT-4E technology is perfect for the needs of the U.S. Forest Service through its extremely robust and reliable operation, modular design and backwards compatibility with the existing USFS radio network.

## **About Codan Radio Communications**

Codan Radio provides communications solutions that enable our customers to save lives, create security and support peacekeeping worldwide. Trusted by the world's largest mission critical, security, military and humanitarian agencies, we've built our reputation for reliability and customer satisfaction over 60 years in High Frequency and Land Mobile Radio communications, in some of the toughest conditions on the planet.
