

Innovation wherever you are.

Manufacturing Engineer

The Company

Codan Limited provides robust and leading edge technology solutions that solve customers' safety, security and productivity problems in the harshest environments on earth. With exports representing 85% of our revenues, our products are sold into more than 150 countries around the world.

Headquartered in modern, stunning facilities in Technology Park, our core values of can-do, high performing, customer driven, and openness and integrity, reflect not only our business, but our people.

The Role

We are looking for a Manufacturing Engineer to join the team who develop, implement and support processes to manufacture both existing and new products.

- Assembly process design, documentation and quotation, ideally within a hi-tech industry
- Teamwork with product designers, ensuring optimum DFM and reliability
- Determining capital equipment and tooling to produce quality right first time at the right cost
- Engineering support to manufacturing improvement projects

Why Codan?

- Ability to collaborate with a professional multi-disciplined team who are passionate and proud to develop and deliver high quality products
- An opportunity to work in a newly renovated first class facility in Technology Park at Mawson Lakes

Applications

We ask for applications that include a cover letter and CV to be addressed to Melissa Burridge, Group Human Resources Manager at careers@codan.com.au by no later than Wednesday July 29, 2017. Phone enquiries are welcome on 8238 0822.
