Codan Radio Communications continues to experience strong growth in the Military Sector

11 September 2017

With recent wins from African Defence and Military based customers, Codan Radio Communications continues to experience strong growth in the Military Sector.

Having released new tactical products to the Military market, Sentry-H™ and Sentry-V™, together with the Patrol 2110M Manpack, we have further expanded our offering to military customers. Along with our investment in the Stealth 9300 antenna series, we are continuing to respond to significant demand from this market.

FY17 was another excellent result, with a revenue increase of 9% to \$70.9 million, Codan Radio Communications remains focused on our Military strategy.

More specifically, we have recently released our family of data application software, SprintChat and SprintNet in line with the updated release of our Sentry-H tactical radio.

Come join Codan at booth N7-384 at DSEI to find out how we can work with you to transform your communications solutions.
