

17th September 2024

It was a pleasure to host Matt Opie, Ilona Horan, Ian Spencer, Glen Gallagher and Anthony (Pog) H. from Defence SA at our Mawson Lakes headquarters yesterday.

Their visit provided an excellent opportunity to showcase Codan's advanced tactical communications capabilities, including our world leading low-latency solutions for MANET Mesh radio networks, as well as Minelab's cutting-edge metal detection technology.

Thank you for your continued support, Defence SA.
